1. The first part of the paper is devoted to a general
discussion of the problem. It is shown that the
problem is of great importance and that it has
not been completely solved. The author then
presents a new method for solving the problem.
2. In the second part of the paper, the author
applies the new method to a specific case. It is
shown that the method is very effective and that
it can be used to solve a wide range of problems.
3. The third part of the paper is devoted to a
discussion of the results. It is shown that the
new method is superior to the old methods and
that it can be used to solve a wide range of
problems. The author then presents a new method
for solving the problem.

MONTHLY SUMMARY OF GAS SALES IN ILLINOIS
As Reported by the Twelve Largest Companies
Whose Business Accounts for Approximately 99%
of Total Gas Sales to Ultimate Consumers in Illinois

April, 1942

REVISION OF THIS REPORT

The Monthly Summary of Gas Sales, beginning with this issue, has been revised with respect to the data, form and method used in its presentation and preparation.

Heretofore Table V, "Commercial, Industrial Non-Interruptible and Other Sales" included all gas sold to industrial, commercial and other ultimate consumers, except gas sold for industrial purposes at interruptible rates (see Table IV "Industrial Interruptible Sales"). However, to provide more detailed information, Table V has now been segregated into two classifications, namely: "Industrial Non-Interruptible Sales", Table V, and "Commercial and Other Sales", Table VI.

Issued June 2, 1942

ILLINOIS GAS UTILITIES
MONTHLY SUMMARY OF GAS SALES
May, 1943

Sales in this category indicate that decreases occurred in revenue : creased 0.9%, therm sales increasing 16.1% and customers 7.5%. However, and number of customers amounting to 10.7% and 1.6%, respectively, for : these percentages of change do not present a true comparative picture, May, 1943, over the same month in 1942, although therm sales increased : because the current month sales data includes customers that have been 5.4%. Exclusive of The Peoples Gas Light & Coke Company, the aggregate : transferred by one or two companies from another classification into this totals for the eleven remaining companies also show that revenue de- : classification because of new and more favorable rates being available.

Monthly Summary of Electric Sales
Monthly Summary of Gas Sales

September, 1943

The Commission's Monthly Summary of Electric and Gas Sales for September 1943, issued November 8, 1943, did not include the sales data for Central Illinois Electric & Gas Company because of changes in billing methods as explained by the note on the cover sheets of both summaries.

This change was applicable only to residential or domestic, rural and some outlying commercial electric and gas customers. Consequently the comparability of other classes of sales was not affected. Apparently the company's accounting procedure seems correct since the advent of bi-monthly billing on September 16, 1943, although the data for those classifications affected are still not strictly comparable. However, it is believed such procedure will not prove particularly disturbing to the major trends.

The following table presents the company's sales data for September 1943, for adjustment purposes.

MONTHLY SUMMARY OF GAS SALES IN ILLINOIS
As Reported by the Twelve Largest Companies
Whose Business Accounts for Approximately 99%
of Total Gas Sales to Ultimate Consumers in Illinois

September, 1943

N. B. The Central Illinois Electric and Gas Company was permitted to place in effect on September 15, 1943, bi-monthly billing. As a result they reported sales data for September, 1943, on a basis which seriously destroyed comparability with the sales data reported for the same month of the previous year. This procedure presents a very disturbing element because of its effect on the statistics and ratios of the Monthly Summary of Gas Sales in Illinois. Consequently, the Summary for September, 1943, does not include the sales data for this company. It is necessary the current Summary be considered preliminary until the matter has been adjusted or clarified.

The twelve largest gas utilities in Illinois reported aggregate sales to ultimate consumers as \$91,432,843, during the twelve months ended June 30, 1949. During the same period therm sales were 1,395,052,271.

The percent distribution of sales shown in the above table, indicates the relative importance of the several customer groups, on the basis of revenue and therms. The "Other" group includes commercial firms and public authorities.

Aggregate revenue increased 9.2% as compared with the previous year, while aggregate therms increased 20.6%. The increased sales of gas were largely due to greater quantities of natural gas made available from added pipe-line facilities.

All classes of customers shared in the increased quantity of gas. Therm sales to interruptible industrial customers increased 54.8% during the year. This large increase occurred principally during the spring, summer and fall months, when firm customer demands were at a low point.
